Cyberbullying:

What is it?

Create an harassment, intimidation, or humiliation online, in particular for children with aggressive rude texts, tweets, posts or messages. This can have bad consequences on mental health and well-being.

Addiction and Screen Time:

Excessive use of video games, social media, and smartphones can lead to addiction and increased screen time.

This may contribute to sedentary lifestyles, poor sleep quality, and hindered physical and mental development.

Privacy Concerns:

Children might inadvertently share personal information online, leading to privacy problems. The use of such information can have serious consequences, including identity theft and online exploitation.

Inappropriate Contents:

The easy accessibility of inappropriate content on the internet poses a risk to the moral and psychological development of children. Exposure to violence, explicit material, or false information can be very dangerous.

There are also positive aspects to use the devices:

Educational Tools:

Smartphones and computers can help as powerful educational tools. Numerous apps and online resources are designed to try learning, providing interactive and engaging educational experiences.

Social Connectivity:

It is a useful tool in difficult situations, because you have everything you need at hand;

Skill Development:

Video games can improve cognitive skills such as problem-solving, strategic thinking, and hand-eye coordination.

Some games are explicitly designed to teach teamwork and collaboration.

Logic of Technology Use in 2023:

In 2023, the use of smartphones and technology will be driven by the need for connectivity, access to information and efficiency. These devices have become integral tools for communicating, learning, and staying informed about the world. Especially for children who know how to use the phone better than most adults.

CONCLUSION

In conclusion, while there are a lot of problems about the risks associated with video games, social networks, and smartphones, it's essential to recognize the positive aspects.

It is important encouraging responsible use, and being able to show how to navigate through the digital world are fundamental to the proper development of a child in today's world.

As we continue to educate ourselves and our children, let's do it for a harmonious integration of technology into our lives while relieving potential risks.
